

## **Aleksandar Mijušković, Chairman of CGES Board of Directors**

Aleksandar Mijušković is a graduate electrical engineer, with over three decades of experience in the energy sector. He has been holding the position of the Chairman of the Board of Directors of Crnogorski elektroprenosni sistem (CGES) since June 2021, in multiple consecutive terms.

Previously, he worked for the Coordinated Auction Office in South East Europe (SEE CAO), an organization responsible for allocation of cross-border transmission capacities between transmission system operators in Southeast Europe, which are also the company's founders.

From 2014 to 2019, he was the Executive Director of SEE CAO, where he played a key role in the operational development and strengthening of the regional auction office. His contribution to the establishment of this successful company began earlier – from 2012 to 2014, he was the Project Team Chairman and the Executive Director of the Project Company, in charge of establishing SEE CAO and launching its functional operations.

From 1995 to 2009, he worked in the National Dispatching Centre (EPCG) where he progressively advanced from an Operational Dispatcher to Chief Engineer for Analytics, Energy Billing and Forecasts. Through these roles, he gained valuable experience in electric power transmission system control, developing expertise in its optimization and analysis.

From 2009-2012, he served as the Director of the Sector for Regulatory, Legal, Personnel and International Cooperation Affairs where he contributed to the strategic development and strengthening of the company.

He is actively involved in international energy organizations and is a member of ENTSO-E General Assembly and Med-TSO General Assembly. Throughout his career, he has been a member of SEETSO TF (South East Europe Transmission System Operators Working Group), which brings together transmission system operators from Southeast Europe, and a member of ENTSO-E (European Network of Transmission System Operators for Electricity), where he participated in the Market Committee and Regional Groups for Southeast Europe. He has also been active as a member of EUROELECTRIC (European Electricity Industry Association), a task force for Southeast Europe.

He is one of the key initiators of the Montenegro – Italy submarine cable interconnection project and actively participated in negotiations with the Italian transmission system operator Terna, contributing to the implementation of this strategic energy project.

As a member of the Montenegrin delegation, he participated in the meetings of the plenary subcommittee and sector meetings of the Enhanced Permanent Dialogue between the European Commission and Montenegro on transport, energy, environmental and regional policy.

He has been a participant in all Athens forums since 2003 actively contributing to regional discussions on the development of the energy sector. Throughout his career, he has built successful collaborations with transmission system operators, energy companies, the Energy Community Secretariat, and international financial institutions. He is also a partner of the Institute of Energy for Southeast Europe (IENE) from Athens. His expertise has been recognized internationally, and he has been an invited speaker at numerous conferences and seminars across Europe, where he shared his knowledge and experience in the fields of electricity and market integration.

Throughout his career, he has continuously improved his professional competencies through international programs and seminars at renowned institutions, including:

- Operational Staff Training Program - Red Electrica, Spain - Madrid, June 2003,
- Market Facilitation Group, SEETEC, Slovenia - Ljubljana, April 2004,
- Seminar Electricity Market – Norway, October 2007,
- Managing your business, managing yourself, JVI Austria – Vienna, October 2008.
